

PRODUCT DATA

Olympic Synthetic Products manufactures a complete line of occupational belts and harnesses specifically for securing, suspending or retrieving a worker from a hazardous work area. Consult appropriate safety rules and regulations for the recommended application of these products. Obtain this information by writing to:

Occupational Safety and Health Administration (OSHA)

200 Constitution Avenue, N.W.
 Washington, DC 20210

American National Standards Institute, Inc. (ANSI)

11 West 42nd Street
 New York, NY 10036
 212-642-4900 www.ansi.org

Associated lanyards or straps should be kept as short as reasonably possible to minimize the length of a free fall. Care should be used to see that the lanyard or strap is attached to a suitable anchorage capable of withstanding the impact should the worker fall. Large "ladder" hooks should never be attached to a D ring or other small anchorage that could possibly cause the keeper to be depressed. The hooks should only be used on large anchorage points, to prevent accidental disengagement. Remember, a knot will reduce the strength of a rope, lifeline or web lanyard by up to 50%.

SAFETY HARNESS SIZING INFORMATION

For 500 & 600 Series

- Small / Medium 30" - 38" waist
- Large / XL 38" - 50" waist
- XX Large Custom fit to size per request

ANSI & OSHA REQUIREMENTS

All products manufactured by Olympic Synthetic Products, Inc. are covered in the Safety and Health Regulations for Construction Title 29, Chapter XVII, Part 1926.500 – 1926.502 and 1926.104. They also meet all guidelines and requirements for ANSI Z359.1 – 1992.

WARRANTY

OSP warrants our products to be free of defects in materials and workmanship at the time of shipment. This warranty is void if any item has been altered or modified in any way or if the product is used in a manner other than for which it is designed. This warranty only covers defects in material and workmanship; it does not cover conditions resulting from normal wear and tear, neglect, abuse or accident.

Olympic Synthetic Products (OSP) is always aware that a harness must possess sufficient strength, safety and comfort without reducing the worker's ability to perform the job. Many workers wear these harnesses all day long and must be assured some degree of ease. With OSP harnesses, every possible effort has been made to guarantee personal safety with added comfort and durability. All of our harnesses are Class Three and conform to applicable ANSI and OSHA standards. Consult your local state agencies for individual user responsibilities.

OSP - 100 SERIES

These harnesses are "Universal Fit" and fit any worker from 120 to 240 pounds. Parachute buckles provide ease of use and ensure 100% closure. They all feature a D ring between the shoulder blades for fall arrest, and are available for fall arrest positioning, retrieval and front positioning.
